OBJECTIVE

Odoo Developer with solid hands-on experience in developing business solutions using the Odoo framework. Experienced in customizing standard Odoo modules, implementing new features based on business requirements, and building complete applications from scratch. Developed a strong understanding of Odoo architecture and backend logic, with growing experience in OWL and component lifecycle in modern Odoo versions. Continuously improving my Odoo technical skills, learning more about the framework internals, and working effectively as part of a development team.
